

Figure 15a – Network depiction of the outlinks from the websites of the 14 U.K. members of Age Platform Europe, colored by geolocation, 7 March 2012. Network visualization by Gephi, laid out by force-based algorithm. Nodes are color-coded to show geolocations of hosts (by IP address), and the color of the edge shows the target of the link. The central nodes (and the majority of nodes generally) are hosted in the U.K. Sources: ageconcernsabe.org.uk, agesectorplatform.org, ageuk.org.uk, bjf.org.uk, britishgerontology.org, cspa.co.uk, homeshare.org, narpo.org, niace.org.uk, npcuk.org, olderpeoplewales.com, pensionerlonline.co.uk, publicservicepensioners.org.uk and wiseowls.co.uk.

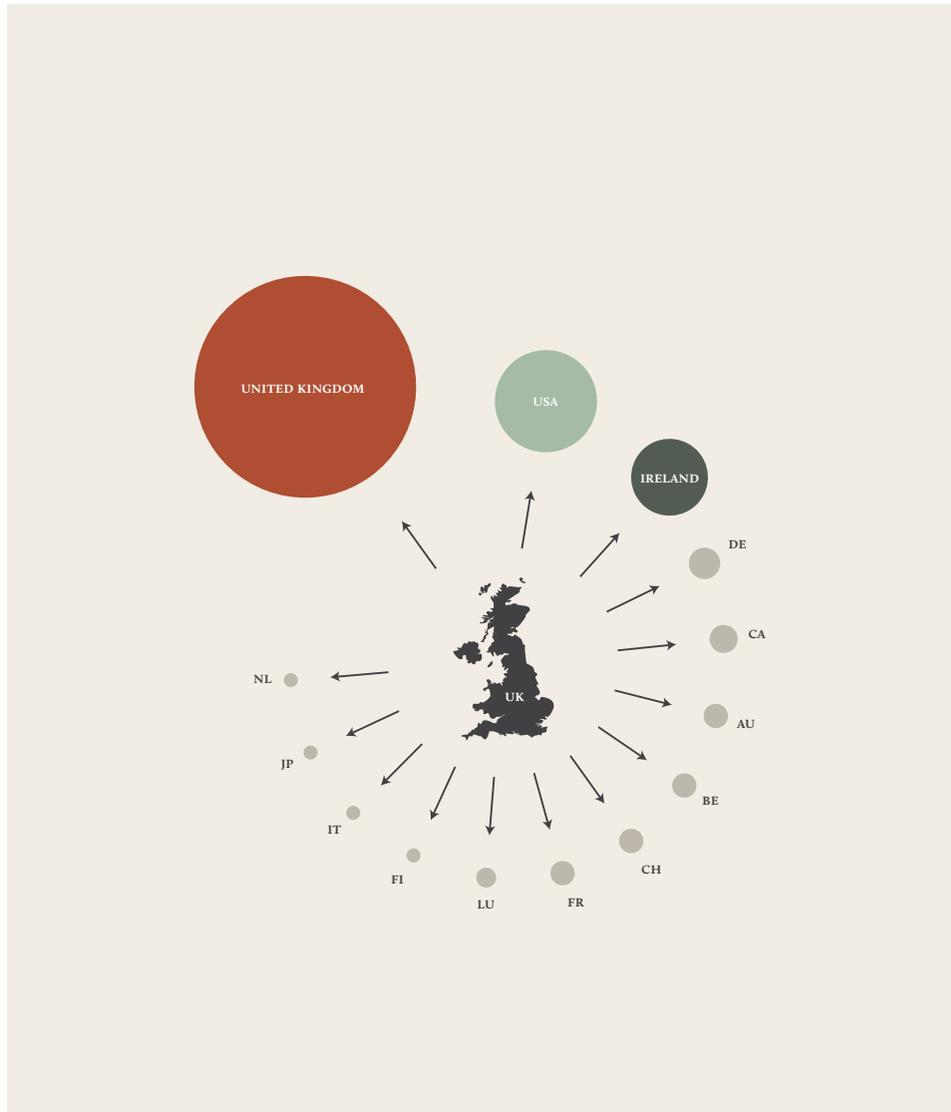

Figure 15b – Network depiction of the outlinks from the websites of the 14 U.K. members of Age Platform Europe, colored by geolocation and resized according to quantity of websites hosted by country, 7 March 2012. Network visualization by hand. The majority of outlinks are to websites hosted in the UK, USA and Ireland. Sources: ageconcernsabe.org.uk, agesectorplatform.org, ageuk.org.uk, bjf.org.uk, britishgerontology.org, cspa.co.uk, homeshare.org, narpo.org, niace.org.uk, npcuk.org, olderpeoplewales.com, pensionerlonline.co.uk, publicservicepensioners.org.uk and wiseowls.co.uk.
